

Subject

Manufacturer position regard:

- article 33 of the REACH Regulation (EC) No 1907/2006 and Substances of Very High Concern (SVHC)
 - Restrictions of Hazardous Substances Directive 2011/65/EU
- Badestnost JSCo., Industrial zone, 6200 Chirpan, Bulgaria

States

Badestnost JSCo manufactures valves, hand pumps and spare parts for these assemblies. The products are targeted for industrial applications and they are sold to authorized distributors in the whole world.

REACH: Article 33 of European REACH Regulation requires suppliers to inform recipients if an article contains more than 0.1% (weight by weight) of any substance on the candidate list of Substances of Very High Concern (SVHC) to allow safe use of the article including, as a minimum, the name of that substance

Based on the information obtained from our suppliers we would like to inform you about SVHC in our products as follows:

Substance	CAS Number	Component	Application
Lead	7439-92-1	Different steel components may potentially contain Lead above 0.1 % by weight.	Hydraulic distributors and hand pumps

The hydraulic distributors and hand pumps have different steel parts. These parts, we produce from different steel alloy and possibly part of them can be made of steel alloy with a lead concentration above the set threshold of 0.1% w/w.

Information for safe use: During normal use the probability or the potential for direct contact with the steel-alloy for end-user is extremely low. During maintenance or repair the probability or the potential for direct contact with the steel-alloy for end-user is low. All steel-alloy parts assembled on the visible area and most of parts assembled inside (the invisible area) of the products have additional corrosion-resistant coating.

Steel alloy products in the natural state do not present an inhalation hazard, however, operations such as burning, welding, sawing, brazing and grinding may result in exposures, which actions are the responsibility of the end user.

The latest list of SVHCs and more detailed information can be found on the ECHA website a <https://echa.europa.eu/bg/candidate-list-table>. To ensure compliance with the requirements of the European REACH Regulation, it is subject to periodic review for changes.

RoHS: All products with electrical or electronic equipment produced by Badestnost JSCo are in compliance with European Union's Restriction on use of Certain Hazardous Substances in Electrical and Electronic Equipment Directive 2011/65 and is periodically reviewed for changes.
